Gurugram, Haryana, India

Associate Technology L2

Publicis Sapient

04/2024 - Present

Gurugram, Haryana, India

As an experienced AEM Developer, I collaborate closely with cross-functional teams, including Business Analysts, to identify and comprehend business requirements and translate them into scalable AEM components. I have demonstrated proficiency in handling AEM upgrades, ensuring a smooth transition from older versions to the latest AEM releases. I effectively resolve compatibility issues and provide technical guidance to our development team. In addition, I have worked on managing expired content by creating automated reports for the publishing team, enabling them to make decisions regarding listed expired content. Furthermore, I have successfully integrated webinar playback and replay functionality into our site using On24 APIs and also worked on the metadata checker process, where Seismic needs some mandatory fields to be pulled from AEM.
